National Model Mat.Hr.Sec School	HSC	65.5%	2022-2023
Sri Jayendra Mat.Hr.Sec School	SSLC	PASS	2020-2021

INTERNSHIP

Full Stack Web Development - Better Tomorrow 2025

During my internship at Better Tomorrow, full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, and Node.js). I designed efficient MongoDB schemas, implemented RESTful APIs for seamless CRUD operations, and built responsive, dynamic user interfaces using React.js and modern CSS frameworks. This experience enhanced my skills in full-stack development, API integration, and scalable application design.

Cyber Security - Prompt Infotech 2025

During my internship at Prompt Infotech, I Conducted a comparative analysis of Angry IP Scanner and Nmap for detecting active devices and open ports in a local network. Scanned subnets like 192.168.1.0/24, exported results in XML, and evaluated both tools based on efficiency, accuracy, and usability. Highlighted Nmap's detailed scanning and Angry IP's speed and simplicity.

PROJECTS

Movie Matcher– Full Stack movie recommendation Platform: 2025

Developed *Movie Matcher*, a full-stack web application that helps users discover and match movies based on mood, genre, and personal preferences. The app features a sleek, responsive frontend built with React and Vite, offering dynamic search, real-time filtering, and personalized movie suggestions. Implemented secure user authentication and managed user profiles, watchlists, and preferences using Supabase for backend services.

Quantum Secure Email System using Hybrid Encryption:

Developed a secure email communication system using AES (Fernet) and RSA encryption to protect message confidentiality. The system encrypts the message and securely transmits it along with an encrypted key via SMTP. Built a user-friendly interface using Tkinter for sending and decrypting emails. Demonstrated secure key exchange, tamper detection, and improved security compared to traditional email systems.

CERTIFICATIONS 2024

CompTIA Security+ | **Udemy**

Complete Ethical Hacking Course 2026 | **Udemy**

Networking Basics | **Cisco Networking Academy**

SQL Basics | **Skill Rack**

Java Basics | **Skill Rack**

Github Copilot Unleashed | **workshop**

SKILLS

Programming	C (Basic) C++ (Intermediate) Python (Basics) SQL MATLAB
Concepts	Data Structures and Algorithms OOPs Kali Linux Operating Systems
Databases	MySQL MongoDB PostgreSQL
Tools	GitHub WireShark Angry IP Scanner Metasploitable VSCode
Networking	Basic Networking OS concepts

ACHIEVEMENTS

Inter College SIH - Finalist	2024
DakshaatT25– Neurahack by GUVI - Finalist	2025
